

PULSE SURFSKI

● ADVANCED

The Pulse surfski is an advanced racing ski designed for smaller, lighter paddlers. Its design has been optimized to reduce the wetted surface area and waterline drag. The hump has been lowered enabling an effective leg drive. Combine this with radical cutaways for one of the best catch entries and there is little wonder why this ski has already proved itself as a race winner. This Pulse surfski can accommodate paddlers up to 6 ft 4 in / 1.93 m.

GENERAL SPECIFICATIONS

LENGTH: 6.0M **WIDTH:** 0.44M **HEIGHT:** 0.34M **WEIGHT CLASS:** 55KG - 80KG
